

Book Fair eWallet: Using unspent funds to create a new eWallet

Once the Fair has ended, any unused e wallet funds will convert to an e gift card balance. Families can use that balance to fund a new e wallet for a future Fair or to shop online with Scholastic. To apply your balance to a new eWallet during the next Fair, start from your school's Book Fair homepage.

Or visit scholastic.com/slash/Fair to find your Fair and follow the same eWallet setup steps you completed previously. Accessing your school's homepage and selecting this button in the eWallet section. Once you've created a new eWallet for your child, you'll need to choose how to fund it. And just a note, if multiple eWallets were previously created using the Scholastic account, all of the unspent balances will be combined here.

To apply any portion of the balance, select the first option, fund with an e gift card balance, and check the box displaying the available balance. If you do not wish to use the entire balance, click on the red bolded amount available, as you see here, and choose a specific amount to apply. Next, click the Fund button and a confirmation will display with the option to Manage My Funds.

Here you can also add more funds with a credit card and invite family and friends to contribute.
